Hush

_Hush little b— don’t say a word._

Steady breathing and remaining calm,
while reclining back, feet will be placed
in Stir-ups to allow physician
to examine the—_Mama’s
gonna buy you a mocking bird._

Medication administered reduces possible pain.
Local anesthetic will numb the cervix.
Possibility of full sedation,
so prepped patient—_won’t sing,_
_Mama’s gonna buy you a diamond ring._

_Tenaculum claps to press and hold
allowing for formation of cannula
and steady dilation of cervix
to create a larger—_ring turns brass,_
_Mama’s gonna buy you a looking glass._

When wide enough for operation,
long plastic tubes will be inserted,
and the suction device will be turned on,
so the placenta—_gets broke,_
_Mama’s gonna buy you a billy goat,_

_The fetus will slowly be broken down
and extracted through the tube.
A final sweep of the uterus
will make sure remains—_don’t pull,_
_Mama’s gonna buy you a cart and bull._
Remains of pregnancy will be disposed of. Slowly sedation will wear off and patient will be asked to remain reclined to recover and not—fall down, 
You’ll still be the sweetest little—in town.

Expected Length of Procedure: 10 to 15 minutes. 
Hush.
