Tracking the Development of Philosophical Dispositions

By: Charles Wright, Ph. D.
Department of Philosophy
with the assistance of:
Abraham Lauer, SJU 2013; Joshua St. George, SJU 2013; Bryan Van Der Heiden, SJU 2014

- Definition of disposition: tendency or propensity to respond to philosophically salient situations by adopting a particular stance, orientation or attitude.
- The CSB|SJU Philosophy Department believes that our curriculum and pedagogy should foster or elicit certain philosophical dispositions.

Four Target Dispositions
1. Comfort with ambiguity (CA)
2. Charitable Reading (CR)
3. Resisting the urge to settle for quick and easy answers (RQA)
4. Pleasure in the struggle with difficult ideas (PDI)

Note: Scores for each scale are the sum of response values for all of the stems associated with each scale.
Note: Spring 2013 pilot sample, using only 26 stems kept after data reduction.

Spring 2013 Pilot Sample from CSB/SJU Student Body
Total N = 528

†Combines two samples: April 2009, students in philosophy classes & October 2009, students with no experience in philosophy.
*Using only the 26 stems kept after data reduction.

Comfort With Ambiguity
- Developing comfort with an inescapable feature of the human condition – that it is possible to understand some kinds of issues more fully without ever being able to establish a single final and correct answer.
- Sample Stem: It bothers me when different perspectives on an issue all seem equally valid. (R) (7 items total)

Charitable Reading
- The practice of considering an author’s ideas in their strongest and most convincing form, of trying to understand an idea or argument from the perspective of someone who would accept it as true.
- Sample Stem: When an author’s writing contradicts my own thinking, my impulse is to read it again more carefully. (7 items)

Resisting the Urge to Settle for Quick and Easy Answers
- A disposition to look past first impressions and commonsense conclusions to search for underlying assumptions, unfamiliar perspectives, and their own unexamined ideas.
- Sample Stem: – I feel like people who disagree with me make me look more seriously at perspectives I’d otherwise dismiss. (6 items)

Pleasure in the Struggle with Difficult Ideas
- Philosophical ideas challenge conventional perspectives on truth, reality, and the good. Making sense of them is as a result frequently difficult for students.
- Sample Stem: If I have to struggle to understand a subject, learning just becomes a chore. (R) (6 items)
