Project Process

MISP Goals

- Assist the Mayo Clinic Ventures/Business Development department with research submissions by Mayo Clinic physicians and researchers
- Provide research opportunities for undergraduate science and business students
- Gain experience working with an interdisciplinary team

MISP Takeaways

“For future plans, this Mayo Scholars introduced me to in-depth product analysis and market research, now is something I could see myself having a career in. It was extremely challenging and frustrating at times, but the end product was exciting and an amazing accomplishment” - Morgan Craig

“Additionally, it has given me the mindset to take risks and continually brainstorm, troubleshoot and develop the ideas that I have to potentially bring them to market. This project strengthened my teamwork and collaboration skills, and has given me an idea of the process behind pursuing a business venture, within medicine” - Donovan Inniss

“The Mayo Innovation Scholars Program is an amazing opportunity for any student to get the chance to see where the respective fields of business and science intertwine.” - Matt Miller

“Throughout this experience, I was surprised by how much I enjoyed the creativity and interdisciplinary collaboration that comes with the program. While challenging at times, it was one of the most rewarding experiences I’ve had at CSB/SJU.” - Kristina Rudin
