ABSTRACT

The 2015 Sigma Gamma Epsilon Undergraduate Research (Poster Session) took place during the 2015 Geological Society of America annual meeting in Baltimore, Maryland on Tuesday, 3 November 2015. One hundred-one (101) posters were presented at the SGE poster session. The National Council of Sigma Gamma Epsilon awarded the Austin A. Sartin Best Poster Award to Kayleigh M. Harvey and Carrie A. Menold, students at Albion College. Kate C. Grisi and Michael Cl Rygel, students at State University of New York, College at Potsdam, were awarded the National Council's Best Poster Award.

KEY WORDS: Austin A. Sartin award, Sigma Gamma Epsilon National Council's best poster award

2015 Austin A. Sartin Award

Recipient of the 2015 Austin A. Sartin Best Poster Award is Kayleigh M. Harvey and Carrie A. Menold from Albion College. The title of their poster: *Using Pseudosections to Help Constrain the Metamorphic Evolution of UHP Eclogite in the North Qaidam Metamorphic Belt, Western China*. Excepting the award from Dr. Aaron Johnson, National SGE President, is Kayleigh M. Harvey.

Abstract: In the Luliang Shan, ultrahigh-pressure (UHP) eclogite occur as boudins in felsic gneiss. Pseudosections for the host gneiss and thermobarometric calculations for the eclogite are in good agreement, and show that both units experienced similar conditions during peak and retrograde metamorphism. While the thermobarometry data allows for an accurate assessment of

the peak and mid-crustal stages, it lacks the ability to predict the composition of the eclogite at all stages of its metamorphic history. This study analyzed the accuracy and reliability of pseudosections for low variance mafic rocks. Comparing the pseudosections to petrologic analysis as well as to traditional thermobarometric calculations allows for greater certainty that the results are accurate. The Luliang Shan eclogite preserves four distinct petrologic stages along the peak to retrograde P-T path: a peak eclogite facies stage (25 ± 2.5 kbar and $590 \pm 25^\circ\text{C}$), lower eclogite facies stage (16 ± 2.5 kbar at $650 \pm 25^\circ\text{C}$), continued exhumation to upper amphibolite facies ($605 \pm 25^\circ\text{C}$ and 13 ± 2.5 kbar) and finally a lower amphibolite stage (510 - 425°C and 5 - 12 kbar). The petrology and mineral chemistry of each stage can be compared to the pseudosection predictions for the same rocks. These stages fall within large phase fields in the pseudosection, which is problematic for determining an exact P-T path with only the pseudosection. Thus, additional modeling of garnet composition and metasomatic reactions aid in constraining a P-T path with pseudosections. With careful selection of parameters, pseudosections can aid in recreating the metamorphic history of mafic rocks.

2015 National Council's Best Poster Award

Recipient of the 2015 National Council's Best Poster Award is Kate C. Grisi and Michael C. Rygel from the State University of New York, College at Potsdam. The title of their poster: *Carbon and Sulfur Geochemistry of Possible Marine Zones within the Pennsylvanian Joggins Formation, Nova Scotia, Canada*. Excepting the award from Dr. Aaron Johnson, National SGE President, is Kate C. Grisi.

Abstract: The Pennsylvanian Joggins Formation is a 932.4 m thick unit that contains 15 cyclothem, each of which records an initial flooding event followed by progradation of terrestrial facies. Although long considered to be nonmarine, recent paleontological discoveries suggest that flooding zones at the base of the formation record marine conditions. We assess the paleohydrology of cycle-bounding shales and limestones by examining their sulfur isotope geochemistry and ratio of organic carbon to pyrite sulfur. Sulfur isotope values of pyrite can be used to assess circulation patterns because bacterial sulfate reducers are free to process largely light sulfur in open circulation conditions, but forced to use increasing amounts of heavy sulfur in restricted conditions. $\delta^{34}\text{S}$ values of pyrite ranged from -8.76‰ to $+23.00\text{‰}$, indicating that the basin was relatively restricted and did not regularly and freely exchange water with the open ocean. The ratio of organic carbon to pyrite sulfur can be used as a measure of “marineness” because pyrite formation is limited by the availability of sulfate in freshwater environments and

organic matter in marine environments. Organic carbon to pyrite sulfur values increased from 0.71 near the base of the formation to 3.50 at the top of the formation, suggesting a waning marine influence. This work supports recent paleontological studies that proposed decreasing marine influence through time, provides some of the first geochemical evidence of restricted marine conditions, and highlights geochemical analyses that may be used to supplement the sparse paleontological record of marine conditions.

DIGITIZING A PALEONTOLOGICAL COLLECTION: LEARNING AND LABOR

FUNKHOUSER, Paige¹, **ROGATZ, Eli¹**, **ALFANO, Alexander P.¹** and **PARSONS-HUBBARD, Karla²**, (1)Geology, Oberlin College, 52 W. Lorain St., Oberlin, OH 44074, (2)Geology Dept, Oberlin College, Oberlin College, 52 W. Lorain St, Oberlin, OH 44074, paige.funkhouser@oberlin.edu

SULFATE CONCENTRATIONS AND DYNAMICS IN THE MAUMEE AND GREAT MIAMI RIVER

FREEMAN, MacKenzie R., Department of Chemistry, Wittenberg University, PO Box 720, Springfield, OH 45501 and **FORTNER, Sarah K.**, Geology, Wittenberg University, Springfield, OH 45501, freemanm1@wittenberg.edu

MAPPING THE EXTENT OF THE COOK CANYON TUFF IN THE SOUTHERN BLACK MOUNTAINS AND CERBAT MOUNTAINS OF ARIZONA VIA ADVANCED SPACEBORNE THERMAL EMISSION AND REFLECTION RADIOMETER (ASTER) IMAGERY

VIDAL, Briana D., Geosciences, Middle Tennessee State University, Murfreesboro, TN 37132, **PERRY, Sarah E.**, Department of Earth Science and Geography, Vassar College, Box 2186, Poughkeepsie, NY 12604, **SCHELAND, Cullen L.**, Geology and Environmental Geosciences, Lafayette College, Easton, PA 18042 and **LANG, N.P.**, Department of Geology, Mercyhurst University, Erie, PA 16546, bdv2j@mtmail.mtsu.edu

CHARACTERIZATION AND QUANTIFICATION OF THE INTERACTION BETWEEN HEAVY METALS AND MICRO-BEADS IN PERSONAL CARE PRODUCTS: POTENTIAL IMPACTS OF PLASTIC PRODUCTS AT THE BALTIMORE HARBOR, MD

FELDSTEIN, Jeremiah J., Towson University, Physics, Astronomy, and Geosciences (PAGS), 8000 York Rd, Towson, MD 21252 and **GEBREHIWET, Tsigabu A.**, Towson University, Physics, Astronomy, and Geoscience (PAGS), 8000 York Rd, Towson, MD 21252, jfelds4@students.towson.edu

INTEGRATING TECTONIC PROCESSES WITH STRUCTURAL GEOLOGY, SEDIMENTOLOGY, AND ENVIRONMENTAL GEOLOGY USING A DEFORMATION SANDBOX MODEL

CHRISTENSEN, Peter Daniel, Physical Science, Southern Utah University, 264 South 800 West, Cedar City, UT 84720 and **MACLEAN, John S.**, Geology, Southern Utah University, SC 309, 351 West University Boulevard, Cedar City, UT 84720, peterdanielchristensen@gmail.com

MIOCENE TUFF OF BONELLI HOUSE, NW ARIZONA: PETROCHEMICAL CONSTRAINTS ON MAGMATIC PROCESSES AND COMPARISON TO UNDERLYING PEACH SPRING TUFF

HESS, Zakkary, Geoscience, State University of New York at Fredonia, 121 Houghton Hall, Fredonia, NY 14063, REGULA, Andrew J., Department of Geology, St. Norbert College, 100 Grant Street, De Pere, WI 54115, MILLER, Calvin F., Dept. of Earth and Environmental Sciences, Vanderbilt University, Nashville, TN 37235, CLAIBORNE, Lily L., Earth and Environmental Sciences, Vanderbilt University, Nashville, TN 37235, MCDOWELL, Susanne M., Geology, Hanover College, 484 Ball Drive, Hanover, IN 47243, CRIBB, Warner, Geosciences, Middle Tennessee State University, Murfreesboro, TN 37132 and COVEY, Aaron K., Department of Earth and Environmental Sciences, Vanderbilt University, Nashville, TN 37235, hess6940@fredonia.edu

ASSESSING HOW ROCK TYPE AND RELATIVE EROSION RATE CONTROL THE CONCENTRATION OF BEDROCK-INCISING GULLIES; GABILAN MESA, CENTRAL COAST RANGES, CALIFORNIA

FRIAS, Miguel, Department of Geological Engineering and Geoscience, University of Wisconsin-Madison, Madison, WI 53715, HILLEY, George E., Department of Geological and Environmental Sciences, Stanford University, 455 Serra Mall, Building 320, Stanford, CA 94305-2115 and JOHNSTONE, Sam, Geological and Environmental Sciences, Stanford University, 450 Serra Mall, Building 320, Stanford, CA 94305, frias2@wisc.edu

STRAIN ANALYSIS ACROSS THE MARGINS OF THE ELKAHATCHEE AND COLEY CREEK PLUTONS, ALABAMA EASTERN BLUE RIDGE: IMPLICATIONS FOR THE ALEXANDER CITY FAULT

ROOP-ECKART, Kenneth J. and BARINEAU, Clinton I., Earth and Space Sciences, Columbus State University, 4225 University Avenue, Columbus, GA 31907-5645, roopeckart_kenneth@columbusstate.edu

CARBON AND SULFUR GEOCHEMISTRY OF POSSIBLE MARINE ZONES WITHIN THE PENNSYLVANIAN JOGGINS FORMATION, NOVA SCOTIA, CANADA

GRISI, Kate C., Dept. of Geology, State University of New York, College at Potsdam, 44 Pierrepont Ave., Potsdam, NY 13676 and RYGEL, Michael C., Department of Geology, State University of New York, College at Potsdam, 44 Pierrepont Ave, Potsdam, NY 13676, grisik196@potdam.edu

STRIKING GRAPHITE BEARING CLASTS FOUND IN TWO ORDINARY CHONDRITE SAMPLES; NWA6169 AND NWA8330

JOHNSON, Jessica M., Department of Geological Sciences, Central Connecticut State University, 506 Copernicus Hall, 1615 Stanley St, New Britain, CT 06050, ZOLENSKY, Michael, ARES, NASA Johnson Space Center, KT, 2101 NASA Parkway, Houston, TX 77058, CHAN, Queenie, ARES, NASA Johnson Space Center, 2010 NASA Parkway, Houston, TX 77058 and KRING, David A., Lunar and Planetary Institute, 3600 Bay Area Boulevard, Houston, TX 77058, johnsonj@my.ccsu.edu

BIOMASS DETERMINATION OF FOREST ECOSYSTEMS

HAAS, Brett¹, HOFMEISTER, Andrew¹, BECKER, Mona L.² and SCULLION, Jason³, (1)McDaniel College, Environmental Studies Department, 2 College Hill, Westminster, MD 21157, (2)Environmental Studies, McDaniel College, 2 College Hill, Westminster, MD 21157, (3)Environmental Studies Department, McDaniel College, 2 College Hill, Westminster, MD 21157, bwh003@connections.mcdaniel.edu

USING PSEUDOSECTIONS TO HELP CONSTRAIN THE METAMORPHIC EVOLUTION OF UHP ECLOGITE IN THE NORTH Qaidam Metamorphic Belt, Western China

HARVEY, Kayleigh M. and MENOLD, Carrie A., Department of Geological Sciences, Albion College, 611 E Porter St, Albion, MI 49224, kmh12@albion.edu

HOW DOES A FOREST ECOSYSTEM SOIL COMPARE TO A NO-TILL SOIL?

PRITCHARD, Ashley, Environmental Studies Department, McDaniel College, 2 College Hill, Westminster, MD 21157 and **BECKER, Mona L.**, Environmental Studies, McDaniel College, 2 College Hill, Westminster, MD 21157, aep007@connections.mcdaniel.edu

HEAVY MINERAL SEPARATION VIA SPIRAL PANNER: AN INEXPENSIVE, BUT EFFECTIVE ALTERNATIVE TO A TRADITIONAL SHAKE TABLE

PATRICK, Wenonah J., Columbus State University, 5454 Old Dominion Rd, Columbus, GA 31909 and **BARINEAU, Clinton I.**, Earth and Space Sciences, Columbus State University, 4225 University Avenue, Columbus, GA 31907-5645, patrick_wenonah@columbusstate.edu

SHIFTING SANDS: PROVENANCE CHANGES IN THE NORTHERN APPALACHIAN FORELAND BASIN

KUSHNER, Baylee, Geography, Geology and The Environment, Slippery Rock University, Advanced Technology and Science Hall, 1 Morrow Way, Slippery Rock, PA 16057 and **SCHIAPPA, Tamra A.**, Department of Geography, Geology and the Environment, Slippery Rock University, Slippery Rock, PA 16057, bxk5612@sru.edu

MAGMA CHAMBER ZONATION AND ERUPTIVE INVERSION IN THE PEACH SPRINGS TUFF: GEOCHEMICAL AND PALEOMAGNETIC EVIDENCE

BARRY, Erin E.¹, **WINSLOW, Heather B.**², **MILLER, Calvin F.**³, **CLAIBORNE, Lily L.**³, **FERGUSON, Charles A.**⁴, **GÓMEZ, Carlos D.**⁵, **VARGA, Robert J.**¹ and **LACKEY, Jade Star**¹, (1)Geology Department, Pomona College, Claremont, CA 91711, (2)Environmental Science, Willamette University, Salem, OR 97301, (3)Department of Earth and Environmental Sciences, Vanderbilt University, Nashville, TN 37235, (4)Arizona Geological Survey, 416 West Congress, Suite 100, Tucson, AZ 85719, (5)Geophysics, California State University Northridge, Northridge, CA 91330, eeb12013@mymail.pomona.edu

GPR ARCHITECTURE OF PALEO-STRAND PLAIN DEPOSITS IN NORTHEASTERN SOUTH CAROLINA

WOOD, Kayla, **WRIGHT, Eric** and **SHEN, Zhixiong**, Department of Marine Science, Coastal Carolina University, P.O. Box 261954, Conway, SC 29528, knwood@g.coastal.edu

STRATIGRAPHIC RELATIONS BETWEEN TWO VOLCANIC UNITS AND THE POSSIBLE LACUSTRINE SEDIMENTS BETWEEN THEM: IMPLICATIONS FOR THE PALEOENVIRONMENT IN TIMES GULCH, NW ARIZONA

MCCOSBY, Joseph Bodie, Clarion University of Pennsylvania, 840 wood st., Clarion, PA 16214, LANG, Nick P., Department of Geology, Mercyhurst University, Erie, PA 16546, BEARD, Emily M., Earth and Environmental Sciences, University of Mary Washington, 1301 College Avenue, Fredericksburg, VA 22401, MILLER, Calvin F., Dept. of Geology, Vanderbilt Univ, Nashville, TN 37235 and FERGUSON, Charles A., Arizona Geological Survey, 416 West Congress, Suite 100, Tucson, AZ 85719, j.b.mccosby@eagle.clarion.edu

LUNAR EXPLORATION FOR HE-3

O'REILLY, Bryan E., School of Earth Sciences, The Ohio State University, 125 South Oval Mall, Columbus, OH 43210, oreilly.92@osu.edu

SIMULATION OF STRUVITE PRECIPITATION FROM SWINE WASTE IN THE PRESENCE OF NICKEL AND ZINC

OHEN, Colynn, Earth and Environmental Sciences, Rutgers University, 101 Warren Street, Newark, NJ 07102 and ROUFF, Ashaki A., Earth & Environmental Sciences, Rutgers University, 101 Warren St., Newark, NJ 07102, Colynn.ohen@rutgers.edu

STABLE ISOTOPIC COMPOSITION OF METEORIC WATER WITHIN CENTRAL OHIO

SAELENS, Elsa Dorothea¹, LESLIE, Deborah², LISTON, Marcus¹, CAREY, Anne E.³ and LYONS, W. Berry⁴, (1)The Ohio State University, School of Earth Sciences, 125 South Oval Mall, Columbus, OH 43210, (2)USDA-Agriculture Research Service, Arkansas State University, PO BOX 639, State University, AR 72467, (3)School of Earth Sciences, The Ohio State University, 275 Mendenhall Laboratory, 125 S Oval Mall, Columbus, OH 43210-1398, (4)School of Earth Sciences, The Ohio State University, 275 Mendenhall Laboratory, 125 South Oval Mall, Columbus, OH 43210-1398, Saelens.7@osu.edu

REMOTE SENSING AND PALEOMAGNETISM OF THE TUFF OF BONELLI HOUSE, NW ARIZONA AND SE CALIFORNIA

GÓMEZ, Carlos D., Department of Geological Sciences, California State University Northridge, 18111 Nordhoff St., Northridge, CA 91330, VARGA, Robert J., Geology Department, Pomona College, Claremont, CA 91711, FERGUSON, Charles A., Arizona Geological Survey, 416 West Congress, Suite 100, Tucson, AZ 85719, LANG, Nick P., Department of Geology, Mercyhurst University, Erie, PA 16546, MILLER, Calvin F., Department of Earth and Environmental Sciences, Vanderbilt University, Nashville, TN 37235, BARRY, Erin E., Geology, Pomona College, Claremont, CA 91711, VIDAL, Briana D., Geosciences, Middle Tennessee State University, Murfreesboro, TN 37132, REGULA, Andrew J., Department of Geology, St. Norbert College, 100 Grant Street, De Pere, WI 54115, SCHWARTZ, Joshua J., Department of Geological Sciences, California State University Northridge, 18111 Nordhoff Street, Northridge, CA 91330 and HESS, Zakkary, Geoscience, State University of New York at Fredonia, 121 Houghton Hall, Fredonia, NY 14063, carlos.gomez.666@my.csun.edu

PETROGRAPHY AND GEOCHEMISTRY OF INTRACALDERA IGNIMBRITE MATRIX AND TUFF BLOCKS: IMPLICATIONS FOR ERUPTION OF PEACH SPRING TUFF AND CALDERA COLLAPSE

WINSLOW, Heather B.¹, BARRY, Erin E.², MILLER, Calvin F.³, CLAIBORNE, Lily L.³ and CRIBB, J. Warner⁴, (1)Environmental Science, Willamette University, Salem, OR 97301, (2)Geology, Pomona College, Claremont, CA 91711, (3)Department of Earth and Environmental Sciences, Vanderbilt University, Nashville, TN 37235, (4)Geosciences, Middle Tennessee State Univ, PO Box 9, Murfreesboro, TN 37132, hwinslow@willamette.edu

HIGH RESOLUTION ISOTOPE SCLEROCHRONOLOGY REFLECTS CHANGES IN THE SEASONAL CYCLE AT ROCKY POINT, BELIZE BETWEEN THE LAST INTERGLACIAL AND PRESENT

YATES, Hayden R., Department of Geology, Washington and Lee University, 204 W. Washington St., Lexington, VA 24450, FALLS, Emily, Geology Department, Washington and Lee University, 204 W. Washington St., Lexington, VA 24450, GREER, Lisa, Department of Geology, Washington and Lee University, Lexington, VA 24450, DECORTE, Ilian, Geology Department, Macalester College, 1600 Grand Avenue, St. Paul, MN 55105, WIRTH, Karl R., Geology Department, Macalester College, Saint Paul, MN 55105, CURRAN, H. Allen, Department of Geosciences, Smith College, Northampton, MA NA, LEONARD-PINGEL, Jill, Geology Department, Washington and Lee University, Lexington, VA 24450 and GREENSTEIN, Benjamin J., Dept. of Geology, Cornell College, Mt Vernon, IA 52314, yatesh16@mail.wlu.edu

MODELING BACTERIA CONTAMINATION OF STREAMS IN MCDOWELL COUNTY, WV

SHINGLER, Jeb, Environmental Studies, McDaniel College, 2 College Hill, Westminster, MD 21157 and BECKER, Mona L., Environmental Studies, McDaniel College, 2 College Hill, Westminster, MD 21157, jcs012@connections.mcdaniel.edu

INVESTIGATION OF BIOCHAR FOR AMENDMENT OF A DISTURBED URBAN SOIL

SWIFT BIRD, Kenneth R., VANEYL-GODIN, Kelsey, FULLER, Jennifer L. and BODENBENDER, Brian E., Geological and Environmental Sciences, Hope College, 35 E 12th St, Holland, MI 49423, kenneth.swiftbird@hope.edu

ASSESSMENT OF GARNET-GRADE METAMORPHISM AT GARNET HILL, PAULDING COUNTY, GEORGIA

ASHWORTH, Alan W., BERG, Christopher A. and ASHLEY, Aaron Wolfgang, Department of Geosciences, University of West Georgia, 1601 Maple Street, Carrollton, GA 30118, aashwor4@my.westga.edu

WHAT'S WEATHERING IN LA SIERRA DE LAS MINAS?
