Sustainable Global Medical Mission Work: The CSB/SJU Global Medical Brigade

Tyler Bruinsma ’17
Past President: Global Health Affairs Club
Program Director: 2016 Global Medical Brigade
Objectives

• Define “Voluntourism” and examine the pitfalls of global mission work
• Introduce Global Brigades Inc. and their holistic model of development
• Examine the underlying causes of poor health and ways to improve these causes through global mission work
• Share stories and experiences from the 3 year history of Global Medical Brigades at CSB/SJU
“Voluntourism”

The conscious, seamlessly integrated combination of voluntary service to a destination and the best, traditional elements of travel — arts, culture, geography, history and recreation — in that destination. – www.voluntourism.org
Fathom combines your love of travel with your desire to make a difference.

“In the Dominican Republic, you’ll have the opportunity to work side by side with local residents in existing programs that focus on improving the lives of children, families and communities.

In Cuba, you’ll participate in an ongoing cultural exchange program that gives you the opportunity to interact with the Cuban people, one on one.

And you’ll come home seven days later knowing that, for the people whose lives you’ve just touched, the world has become a little brighter because of you.” –Fathom Website

Voluntourism- Bottom Line

Voluntourism is centered on the desires and needs of the voluntourist NOT the people that are being served.

“\[I\] don't believe in charity. I believe in solidarity. Charity is so vertical. It goes from the top to the bottom. Solidarity is horizontal. It respects the other person. I have a lot to learn from other people.\]”

— Eduardo Galeano
Mission:
To empower volunteers and under-resourced communities to resolve global health and economic disparities and inspire all involved to collaboratively work towards an equal world.

Vision:
To improve equality of life by igniting the largest student-led social responsibility movement on the planet.
The Holistic Model and Process

1. Research and Evaluation
2. Community Partnership
3. Program Preparation
4. Program implementation through interdisciplinary brigades
5. Staff follow-up
6. Sustainable transition from communities
